**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cold at all levels despite the light winds. Very poor visibilities in thick cloud above 400m to summits.

Forecast for Wednesday 26 Jan 2022

Weather: A few clear spells overnight, especially in the east, but thicker cloud brings patchy rain or drizzle to western hills towards dawn. Then cloudy through much of the morning with further patchy light rain or drizzle. Brighter for a time in the afternoon with some sunny spells before cloud and outbreaks of rain spread south through the evening.

Maximum wind: Westerly or southwesterly 10-15mph increasing 20-25mph, gusts around 45mph over ridges and summits in evening.

Chance of cloud free mountain/hill tops above 800m: Little chance across the north and west through the morning, around 30% in the east, and more generally for a time in the afternoon. Chances fall again in the evening

Visibility: Periods of persistent cloud above 450-600m in the west, but cloud more occasional at times in the east and more generally through the afternoon. Otherwise visibility good or rather hazy, falling to several kilometres in rain and drizzle

Temperature: **Valleys:** Around plus 1 or 2 Celsius in east, but 4 or 5 in west, rising to plus 8 or 9 Celsius by day
At 800m: Around plus 3 Celsius
Freezing level: 900m but soon rising above the summits
